focus

Designed for all staff and departments who use Accela

Enhancements – A project update regarding our scanning request:

Our Subject Matter Experts had a conference call with Accela's Product Development and Consulting team. We have requested that scanning is available at the time we are working with a permit or record type. Embedding this function within the Accela product will be a welcome improvement as we currently have to work with scanned objects after the fact. We are appreciative of Accela's willingness to consider making these types of improvements to the product; we feel this is a win-win situation. Today Accela's functionality is on the backend of the process as it interacts with document management systems. So, in the future when you are working with an Accela record type you just might be able to scan a document and have it be appended to the record at the "point-of-record".

Accela Analysis Center:

The final review of the analysis session's documents is moving forward at a fast pace. The sign offs for the documents are beginning to roll in. Public Works and Utilities have actually completed and signed off all of their reviews. The Health Department has only two remaining reviews. Planning is nearly half way through theirs and Building and Safety is making great progress as well. Darren and Shauna are busy configuring these records in the new system permit by permit with their offsite efforts.

This is the last edition for 2011.

SOMETHING TO THINK ABOUT

"The best and most beautiful things in the world cannot be seen or even touched. They must be felt with the hearts. Wishing you happiness."

- Helen Keller

Accela Overview Product Demo:

January 17, 2012

Please choose from one of the sessions

9-11 AM or 1-3 PM

Lincoln Lancaster Health Dept.

Room 212 and 213

Take advantage of this opportunity to review and ask questions

*Happy
Holidays!!!*
